Other tools: visual studio , etc.

ABOUT EXISTING SYSTEM

- In existing system all the products are sold by manual way.
- Consumers needed to go to stores and buy a products or change the products. Customer don't have to wait for days to get the products.
- Once you choose the right product suitable for yourself , make the payment and take it home.
- You get to examine a variety of choices and buy the one that you like most.

DISADVANTAGES Of EXISTING SYSTEM

- Sometimes malls and markets are so crowded that you can barely walk.
- Consumers need to visit the shop when they need to replace their product.
- Consumers have to travel a certain distance to the product.
- More costumers can be reached through the internet.

ADVANTAGE OF EXISTING SYSTEM

- Customer will find affordable and excellent price available online since you get products directly from the seller without involving any Deller.
- Customer can find different products and brands form various seller all of them in the same place.
- Most people don't like crowded places when shopping mostly during special events they happen to be hectic.
- It's much easier to compare and research items and their prices in online shopping.

OBJECTIVE OF THE SYSTEM

- The main objective of the online shopping system is to manage the details of shopping , payment , bills , customer.
- Admin manage the different categories of products.
- Consumers can buy products as per their choices through online.
- System collect data by manually from customers to get more information easily.

MODULES OF THE SYSTEM

- ADMIN
- CUSTOMER
- VISITOR

FUNCTIONALITY OF ADMIN

- Login
- Forgot password/reset
- Manage category
- Manage products
- Manage subcategory
- Manage feedback
- Logout

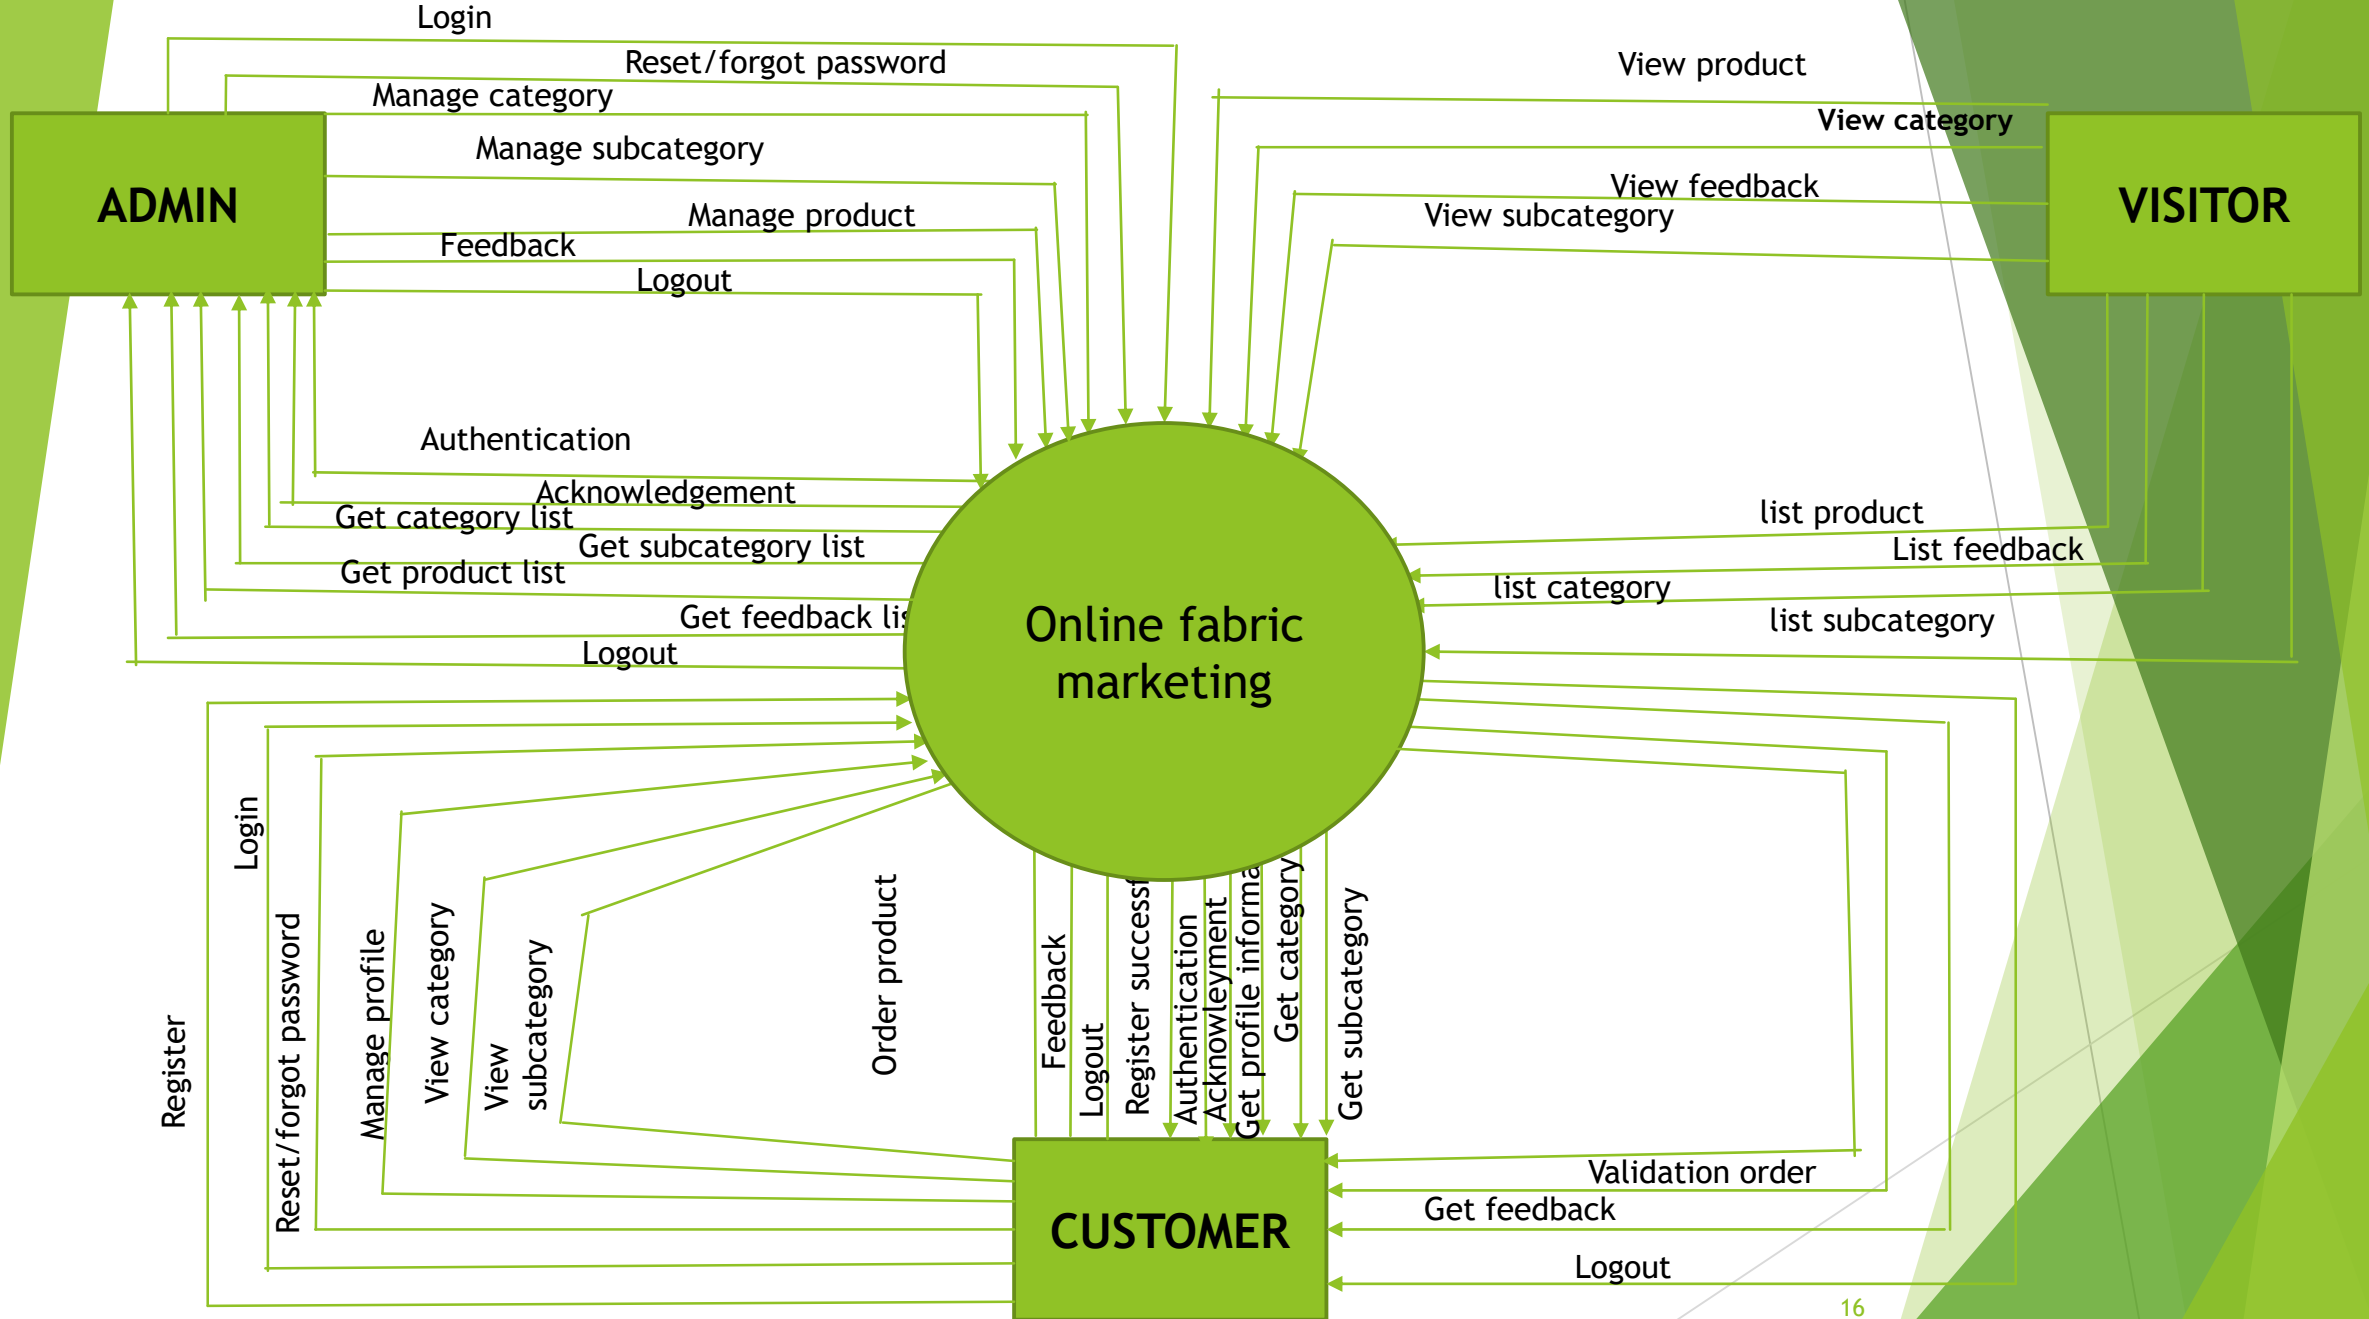

FUNCTIONALITY OF CUSTOMER

- Register
- Login
- Reset/forgot password
- Manage profile
- View category
- View subcategory
- Order products
- Feedback
- Logout

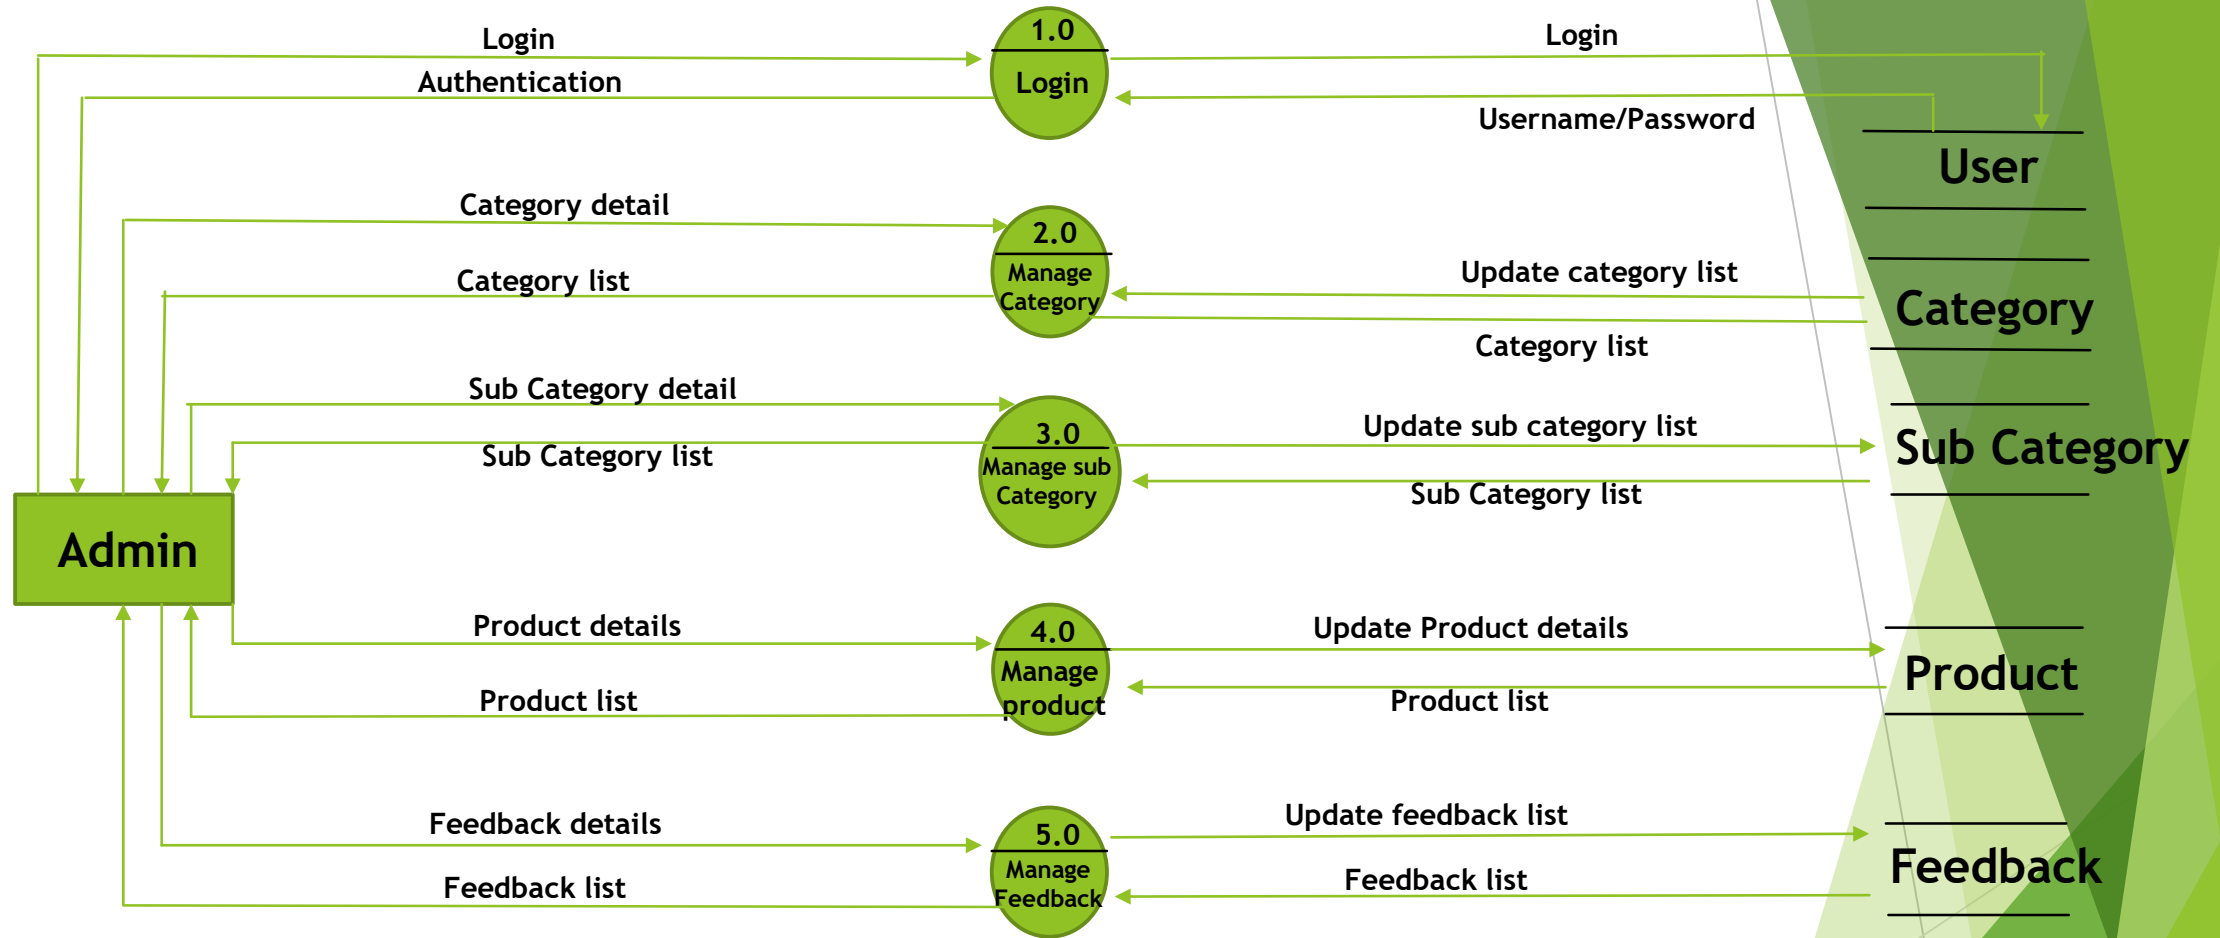

FUNCTIONALITY OF VISITOR

- View category
- View subcategory
- View Products
- View Feedback

Data dictionary

- Admin table
- User table
- Category table
- Sub category
- Product table
- Order table
- feedback

Admin Table

Sr.no	Name	Data-type	Constraint	Description	Example
1.	Email	Varchar(20)	Pk	Login email	admin@gmail.com
2.	Password	Nvarchar(10)	Not null	Password	admin@123

User table

Sr.no	Name	Data_type	Constraint	Description	Example
1.	U_id	Int(3)	Pk	Uniquely identify the user	1
2.	Area_id	Int(3)	Fk	Reference to area table	380095
3.	U_name	Varchar(30)	Not null	Store the user name	Navin bhai
4.	Email	Varchar(25)	Not null	Stores users id	mg123@gmail.com
5.	Password	Varchar(10)	Not null	Stores users password	*****
6.	Address	Varchar(50)	Not null	Stores users address	45,anmol flat , neharunagar
7.	Gender	Char(1)	Not null	Stores an the gender details	male
8.	contact no.	Varchar(10)	Not null	Store the user contact number	9651415411

Category table

Sr.no	Name	Data-type	Constraint	Description	Example
1.	Category_id	Int(3)	Pk	Category Id	201
2.	User_id	Int(3)	Fk	Reference to user	101
3.	Category_name	Varchar(20)	Not null	Category name	Satin,rawn, silk,cotton

Sub Category table

Sr.no	Name	Data-type	Constraint	Description	Example
1.	Sub_Category_id	Int(3)	Pk	Category Id	301
2.	Category_id	Int(3)	Fk	Category Id	101
3.	SubCategory_name	Varchar(20)	Not null	Subcategory name	Colour

Product table

No.	Field name	Data type	Constraint	Description	Example
1.	Product_id	Int(4)	Pk	Unique id of product	401
2.	Product_name	Varchar(20)	Not null	Product name	Satin,rawn,silk, cotton
3.	Product_price	Float(10)	Not null	The product price	500
4.	Prod_description	Varchar(50)	Not null	Description of the product	XYZ..
5.	Product_quantity	Int(50)	Not null	Quantity of the product	2
6.	Product_size	Int(28)	Not null	Size of the product	14
7.	Product_image	base64	Not null	Image of the product	Image1.jpg

Order table

Sr.no	Name	Data_type	Constraint	Description	Example
1.	Order_id	Int(3)	Pk	Uniquely identify the order.	1
2.	User_id	Int(3)	Fk	Reference to user table.	380095
3.	Delivery_status_id	Int(3)	Not null	Stores the product status.	223
4.	Order_date	Date	Not null	Stores product delivery date.	02-05-2021
5.	Amount	Int(5)	Not null	Stores product amount.	5000
6.	Address	Varchar(50)	Not null	Stores users address.	45 anmol flat , neharunagar
7.	Contact_no	Int(12)	Not null	Stores an the contact details.	9146323541

Feedback

No.	Field name	Data type	Constraint	Description	Example
1.	User_id	Int(4)	Fk	Uniquely identify user of the system	6376
2.	Order_id	Int(3)	Fk	Reference to order	243
3.	Product_id	Int(4)	Fk	Reference to product	2425
4.	Ratings	Float(5)	Not null	Stores the ratings of a product	5
5.	Feedback	Varchar(50)	Not null	Stores the feedback of the order	Good
6.	Feedback date	datetime	Not null	Stores date feedback was published	12-03-2021
